

Dear trader,

VertiCer will continue to offer the cancellation statement. This decision has been taken in response to the many comments received from users of guarantees of origin.

Why is the cancellation statement being retained?

VertiCer had previously indicated that the cancellation statement might be discontinued. Before a decision was taken on this matter, users were given the opportunity to express their views. The feedback showed that many users would like to retain the cancellation statement.

Exploring alternatives

VertiCer has assessed all the feedback and investigated what other options are available. Together with auditors, we have also looked at alternatives, such as:

- a live download of a CSV file;
- the use of screenshots as supporting evidence.

Decision

Based on the feedback received, VertiCer has decided to retain the cancellation statement in PDF format. This document is important to many users. If an auditor prefers to work with a CSV file, that option will remain available.

Amendments to the document

The current cancellation statement does not yet fully comply with European regulations. The document will therefore be amended and supplemented with additional information. As soon as more details about these changes are available, VertiCer will inform you accordingly.

Kind regards,

VertiCer
