Dear trader,

We would like to take this opportunity to inform you of the tariff proposals we have put forward for 2027.

Every year, VertiCer submits a proposal for new tariffs to the Ministry of Economic Affairs and Climate Policy
This proposal is partly based on developments in 2026. It also takes into account the outlook for 2027. This year, VertiCer has made significant strides towards working more efficiently.
For example, since 2026, VertiCer has been using a single integrated IT system for all energy carriers, which requires less maintenance.

We have summarised the key changes for you:
- The membership fee is being reduced from €3,000 to €2,000
- All transaction fees are being reduced by 20%
- There will no longer be a transfer fee after the initial issue of the Guarantee of Origin

The Ministry is reviewing our proposal and will make a decision later this year
We'll keep a close eye on developments and let you know straight away as soon as there's any news!
